COMPUTER AIDED REPAIR SYSTEM FOR REPAIRING ALL MAKES ELECTRONIC INJECTORS

No more Trial and Error

Everybody who has worked on electronic injectors knows that repair is just about trial and error. Sometimes the repair is not successful and the reason is unknown. Experience and knowledge is a must but it is not always enough to complete a successful repair.

KO4000 CARS is the most advanced system to eliminate the trial and error in the electronic injector repair process. System is capable to calculate adjustment shim thickness at each step with micron accuracy. The control software displays the calculated adjustment shim thicknesses together with assembly instructions at each step of the repair.
